PRODUCT INFORMATION

RootShield® *PLUS*® Granules Biological Fungicide is a preventative biological fungicide for control of soilborne plant pathogens and plant root diseases. The active ingredients are microbes, *Trichoderma harzianum* Rifai strain T-22 and *Trichoderma virens* strain G-41, that, when applied as an inoculant to soil or to planting mixes, grow onto plant roots as they develop and provide protection against plant root pathogens such as *Pythium*, *Phytophthora*, *Rhizoctonia*, *Fusarium*, *Cylindrocladium* and *Thielaviopsis*.

RootShield *PLUS*® Granules Biological Fungicide can be used in combination with or in rotation with most other fungicides, insecticides, miticides, fertilizers or micronutrients in accordance with the most restrictive of label limitations and precautions. Do not exceed label dosage rates. This product cannot be used with any product containing a label prohibition against such mixing. **This product is not compatible with chemicals that contain the following active ingredients: imazail, propiconazole, tebuconazole, and triflumizole.** Do not apply RootShield *PLUS*® Granules Biological Fungicide immediately before these pesticides are used. See specific instructions for tank mixing. Where early season seed rot and seedling diseases are expected, use chemically treated seed or other appropriate measures for stand establishment and RootShield *PLUS*® Granules Biological Fungicide for root disease control.

Note: RootShield *PLUS*® Granules Biological Fungicide contains live spores of microbes that must be used prior to disease onset. RootShield *PLUS*® Granules Biological Fungicide becomes active in soil or on plants when temperatures are above 50°F and is not effective while temperatures remain cold. RootShield *PLUS*® Granules Biological Fungicide can be applied to sterilized or fumigated soil but must be applied after sterilization or fumigation.

This biological fungicide is for use in soil applications (in soil furrow, and potting soil), for all listed crops.

USE RESTRICTIONS

Cover applied product with soil, irrigate with at least 1/8" of water, or otherwise incorporate it into the soil. For certain crop groupings or crops, indicated below, this product is not for use in California.

**** ATTENTION: DO NOT APPLY to sugarcane, pechay (bok choy), rice, mushrooms, kiwi, barley, oats, lemon, apple, and chickpea. Not for use on aquatic crops.**
