Bud Fuel™ Pro	-	-	-	1 ml
Total EC	1.14	0.96	1.89	2.13
Total PPM	570	479	947	1065

Seedling: A mild formula specifically created to help freshly germinated seeds or very young cuttings.

Transplant: A comprehensive mix of products to ensure lower stress and increased growth in transplants before moving to a stronger formula after plants are established.

Growth: A concentrated formulation for aggressive feeders and larger plants.

Pre-Flowering: Specific to the critical stage where plants are in the process of switching their energy focus. A high-powered formula to ensure the plant is properly supplied with nutrients for the development of flowers and fruit.
