ASSEMBLY INSTRUCTIONS

STEP 1: BUILD THE FRAME

Connect the grow tent framework, ensuring that the poles are seated properly in the corner connectors. You may need to gently twist the poles back and forth until the connection tabs pop out and lock into place.

3-WAY CORNERS

Each corner fitting has an arrow showing which of the three legs is the vertical piece, and a black cap to protect the tent fabric where the framework touches the ceiling and floor. Be sure that the black caps are facing the top or bottom of the tent framework and the arrows are pointing up or down. This will ensure that the connection tabs line up correctly.

VERTICAL POLES

Each vertical piece of the framework requires two different poles: ③ (+) and ④ (-). Be sure to position the #3 pole on the **lower** half of the tent frame.

ASSEMBLY INSTRUCTIONS

STEP 2: ADD THE TOP SUPPORT BARS

Install the deeper bar first, with the shallow bar perpendicular to it on top.

Important: Hang lights or other equipment from the top bar only, so the weight is supported by the deeper bar.

*Deep support bar
on the bottom*

*Shallow support bar
on top*

STEP 3: INSTALL THE TENT FABRIC

Two people are recommended for faster and easier assembly.

- A. Unzip and open the tent fabric.
- B. Find the floor of the tent fabric (it's the side with no vent openings).
- C. Place the assembled frame into the floor of the tent fabric.
- D. Install the floor liner into the tent, securing each corner with the hook and loop straps.
- E. Pull the grow tent fabric over the constructed framework and make sure the top of the canvas is completely seated over the corners.
- F. Pull the upper and lower zippers together to close the walls and door.
