

MOBILE RACK TRAYS

Botanicare Mobile Rack Trays are optimized to eliminate standing water in your vertical system. They are crafted from heavy-duty ABS plastic with long-term performance in mind. Each provides a level planting surface, while directing run-off to a central drain with the built-in 1.5" offset. This design helps prevent excess liquid in your setup. Mobile Rack Trays are tailored for the Spacesaver Widespan GROW system and are also compatible with other manufacturers' systems.
