Volts/Hz	120V/60Hz
Current	1.9A
Watts	220W
CFM	8050
RPM	1100

### 30" HIGH VELOCITY DRUM FAN (JF13010)

Volts/Hz	120V/60Hz
Current	3.3A
Watts	330W
CFM	9100
RPM	1100

# INSTRUCTIONS

**CAUTION:** Read and follow all instructions before operating fan. Do not use fan if any part is damaged or missing. Do not alter the fan's assembly.

## **WARNING**

To reduce the risk of fire or electrical shock:

- Do not expose to water or rain.
- Do not use this fan with any solid state speed control device.

To reduce the risk of injury or damage:

- If the fan is automatically operated, disconnect from power supply before servicing.
- If the power supply cord is damaged, contact your local service center or a qualified electrician to install an appropriate replacement cord.

Do not operate this fan in locations where special conditions prevail, such as the presence of a corrosive or explosive atmosphere (dust, vapor, or gas).

This fan is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge.

## **RULES FOR SAFE OPERATION**

1. Never insert fingers or any other objects through the grill guard when fan is operating.
2. Disconnect the fan from its power source when moving from one location to another, or when removing guards for cleaning.
3. Be sure fan is on a stable, flat surface when in operation.
4. Do not use fan in windows. Rain and moisture may create electrical hazard.
5. Close supervision is necessary when fan is used near children, the elderly and pets.
6. Do not place the fan near an open flame, cooking or heating appliance, or hot surface.
7. This fan should not be operated outside.

 **WARNING:** Be sure that both front and rear guard screws are completely tightened in locking position before operation.

## **OPERATING INSTRUCTIONS**

### ***To adjust airflow upward or downward***

Tilt fan head to the desired angle.

This high velocity fan can be used alone or in conjunction with air conditioning.

Rotating the fan head upward serves to pull air from the floor and circulate it throughout the entire room.

### ***Speed control***

Select air speed by setting switch to either HIGH(3), MIDDLE(2), LOW(1), or OFF(0).

It is normal for the motor to feel warm to touch after continuous operation.

The fan thermostat will automatically shut off power if the fan overheats. If this happens, immediately unplug the fan from the outlet.

## **CLEANING INSTRUCTIONS**

 **WARNING:** Unplug from electrical supply source before cleaning.

1. Use soft damp cloth to clean, then wipe with dry cloth.
2. Do not use a cleaning solution that is harmful to paints or plastics.
3. Do not bend the blades.

## WARRANTY

### LIMITED WARRANTY

Hydrofarm warrants the **JETFAN** to be free from defects in materials and workmanship. The warranty term is for one year beginning on the date of purchase. Misuse, abuse, or failure to follow instructions is not covered under this warranty. Hydrofarm's warranty liability extends only to the replacement cost of the product. Hydrofarm will not be liable for any consequential, indirect, or incidental damages of any kind, including lost revenues, lost profits, or other losses in connection with the product. Some states do not allow limitation on how long an implied warranty lasts or the exclusion of incidental or consequential damages, so the above limitations or exclusions may not apply to you. Hydrofarm will, at our discretion, repair or replace the **JETFAN** covered under this warranty if it is returned to the original place of purchase. To request warranty service, please return the **JETFAN**, with original sales receipt and original packaging, to your place of purchase. The purchase date is based on your original sales receipt.
