

Commercial Heat Mat Add-On Unit

INSTRUCTIONS

1. Place the mat on a stable dry surface this side up.
2. Connect the mat to an MTMDU Commercial Heat Mat or in series with another MTMDA Add-On Mat only (see special notes below).

SPECIAL NOTES - PLEASE READ BEFORE OPERATING

This heat mat is a modular add-on unit only, and must be connected to an MTMDU Commercial Heat Mat (if it is the first MTMDA in series after an MTMDU—otherwise it must be connected to another MTMDA in series), which in turn must be plugged into an MTPRTC Digital Temperature Controller. Failure to operate MTMDA/MTMDU mats via an MTPRTC Digital Temperature Controller will result in excessive root zone temperature. A total of 5 daisy-chained/interconnected heat mats (4 MTMDA Add-on Mats plus one MTMDU Commercial Mat) can be controlled by a single MTPRTC. Do not daisy-chain more than four MTMDA mats to an MTMDU and MTPRTC.

WARNINGS

- Fire or electric shock may result from improper use
- Make sure that the surface under the mat is free of sharp points or objects which might puncture or damage the mat
- DO NOT place the mat inside the propagation tray or cover it directly with soil or any other growing medium
- DO NOT immerse in water
- DO NOT place any heat insulating materials over the mat as this could cause it to overheat
- COVER THE 120V PLUG WITH THE CAP WHEN NOT IN USE

SPECIFICATIONS:

Size: 60"L x 21"W

Voltage: 120 VAC

Wattage: 140W

Item Code: **MTMDA**

Model #: 19008
