

Sustainable Solution

Use from **Seedling** to **Harvest**

- Easy 1-2-3 Step Application
- Spray weekly or at every watering
- For infestation, increase dilution rate and spray schedule

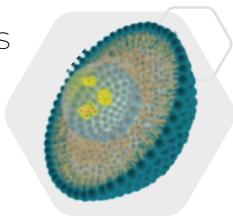

STEP 1  Start with water

STEP 2  Add PureCrop1

STEP 3  Spray or add to drip

Colloidal Micelle Nanotechnology

Our nanotechnology-based formula provides numerous benefits over harsh chemicals. It activates quickly and reliably, delivers sustainable outcomes, and is safe to use around children, pets, and the environment when used as directed.

WEST COAST AG PRODUCTS

We believe that by bridging innovative technologies with traditional practices, we can advance the **viability of sustainability** for growers worldwide.

West Coast Ag Products offers **innovative solutions** that simplify crop management by providing a powerful technology that benefits plants, growers, and the environment.

PureCrop1[®]

All-In-One Organic
Solution for
Hydroponic, Nursery,
and Home-Use.

Eliminate Pests, Mold, and Mildews
while Boosting Plant Health with

Nanotechnology

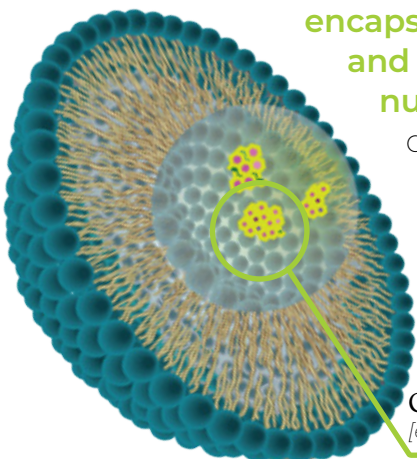

WEST COAST
AG PRODUCTS

Size Sets Us Apart

Our colloidal micelles, measuring **1 – 4 nanometers**, transport up to 20% of their weight in polar and non-polar particles,

encapsulating and delivering nutrients

directly to plants without clogging stomata.

Carried Particles
[e.g. Nutrients, etc.]

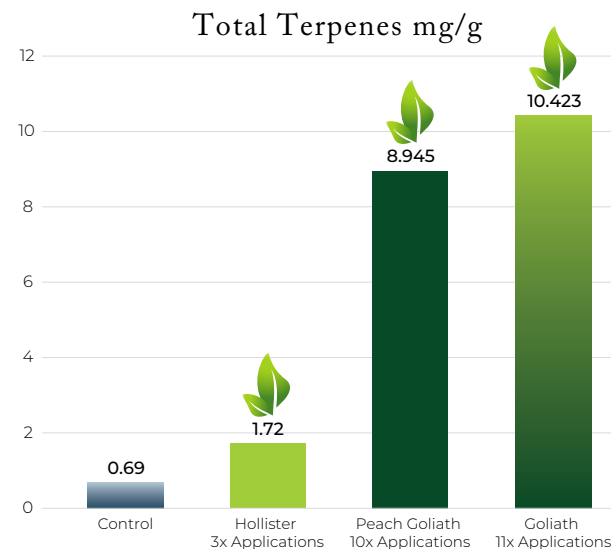

Benefits

- No Phytotoxicity 🌱
- Increases Terpenes 🌱
- Organic | OMRI-listed 🌱
- Speed Up Harvest Time 🌱
- Naturally Biodegradable 🌱
- Supercharge Other Inputs 🌱
- Increase Nutrient Utilization 🌱
- People, Pet, & Planet Friendly 🌱
- Can be Used in Nutrient Sprays 🌱

A Clear Trend

Plants treated with NanoCrop exhibit significantly higher terpene levels than untreated plants.

Tackle These Issues

Insecticide

Our formula **eliminates sap-sucking insects** by interfering with their digestive enzymes **without harming beneficial insects**, including predatory mites, ladybugs, bees, and others.

Fungicide

Using **membrane disruption**, PureCrop1 kills mold & mildew on contact. Its **surfactant** qualities and nanoparticle size allow absorption into the sap layer and create a **protective barrier that lasts up to ten days**.

All Sap-Sucking Pests including:

- 🌱 Aphids
- 🌱 Spider Mites
- 🌱 Russet Mites
- 🌱 Thrips

Mold & Mildews including:

- 🌱 Powdery Mildew
- 🌱 Downy Mildew

Will not harm beneficials such as lady bugs and bees!

Surfactant

Surfactants **lower the surface tension** between a liquid and a solid or air. Due to its electrical properties, PureCrop1 is a natural surfactant that's **compatible with most other products**.

Bio-Stimulant

PureCrop1 delivers fatty acids from **plant-based ingredients** directly to the sap layer where it can be used immediately by the plant. This **increases sugar levels**, which can **help plants resist pests naturally**.
