PLANT GROWING MEDIA

Mother Earth™/MC Coco is a plant growing media that is a great alternative to potting soil and other traditional growing medias, like peat-based products. It is made from the pith and fibers of coconut husks, giving it an excellent water-to-air ratio. Coconut coir is known for the ability to naturally retain moisture many times its own weight.

Coconut coir has become a popular growing media worldwide. Coconut coir is used successfully by commercial growers around the globe. Since it all starts with coconuts, a renewable resource, it is environmentally friendly from the beginning. Use Mother Earth™/MC Coco for better aeration and drainage in all types of indoor or outdoor container gardens. Unlike traditional growing medias, coconut coir can resist compaction and lasts longer in a container.

Mother Earth™/MC Coco is crafted using a state-of-the-art production process so you can be sure you're getting one of the most consistent, highest-quality coconut coir growing media products available. It is also pre-buffered, so it is ready to plant in right out of the bag without the need to further rinse or condition. A fully renewable resource, Mother Earth™/MC Coco is a smart choice for you, your plants and our planet.

#### DIRECTIONS FOR USE:

##### INDOOR OR OUTDOOR CONTAINER GARDENING:

Plant directly in Mother Earth™/MC Coco.

##### AUTOMATIC SYSTEMS AND INDOOR GARDENING:

Irrigation frequency and volume depends on container size, plant type, stage of growth, environmental conditions, and irrigation method.

With any planting, please follow your preferred nutrient program. For container growing, always choose the proper size container for your application and plant type. If in question, always use a larger container versus an undersized one as it will provide a better environment for your plants to thrive in. Do not over-water your plants and make sure they are able to freely drain excess water.

#### INGREDIENT: Coir

Size: 1.8 cubic feet (50 liters)  
Net Weight: 15 lb (6.8kg)

Wear gloves and wash hands after use.  
Use with adult supervision.
