INSTRUCTIONS FOR USE

<u>ESTABLISHED ROSES AND FLOWERS</u>:
Apply in early spring when new growth starts to appear. Mix 1 cup of fertilizer into the soil around the base of each plant. Scratch it in and water. Repeat after 4-6 weeks.

<u>ESTABLISHED ANNUAL AND PERENNIAL FLOWER BEDS</u>:
Apply 2 cups per 5'x5' area of planting bed, around the base of the plant. In spring and early summer. Scratch in and water.

<u>CONTAINER PLANTING:</u> Apply 1 tbsp per 6" diameter of container size or 1 tbsp per gallon of container size

<u>AMENDING RAISED BEDS AND CONTAINERS</u>:
Apply 3 cups per 5x5 of the surface area of soil and mix the into top 3"-6" of soil. For new plants in containers, mix 1/2 cup per cubic foot of potting soil prior to filling your container. Mix in and water after planting.
