

BioRoot® 0-1-1 is a plant food that can be used through the full life of the plant from vegetative growth where leaves and stems develop through to flowering where blooms are created. BioRoot can be used for seedlings and cuttings as well as all phases of plant growth. Use BioRoot with all types of plants growing in all kinds of garden soils and potting mixes. Works with all plant foods.

General Organics® provides gardeners with a superior line of plant foods. Each product in the "GO" line enables you to enrich your garden, your life, and the planet. Our commitment is to provide simple and innovative products with unsurpassed quality. This product contains no added microbes.

Usage:

For Light Feeding:

Add 1 teaspoon (5 mL) of BioRoot per gallon of water.

For Heavy Feeding:

Add 2 teaspoons (10 mL) of BioRoot per gallon of water.

These values represent standalone use of this product. When mixing with additional products or base nutrients, please refer to generalhydroponics.com for complete Feed Programs.
