

**NEW!**  
FOR 2021

# HYDROID™

It's 2021 and HydroLogic continues to be the #1 water filtration company in the agriculture industry with a brand new, professional filter system designed to take your garden to the next level!

## Introducing: The HYDROID

The HYDROID is the industry's first compact and portable commercial water filter at an affordable price with premium features. Achieve up to 4,500 GPD capacity with its blend valve feature, or 3,000 GPD of pure RO water. Not only is the HYDROID powerful, but it can produce a 2:1 ratio (2 parts product to 1 part waste water), making it the most efficient system in its class. New, groundbreaking technology for a compact system with commercial scale performance.

- ◆ Compact Commercial Reverse Osmosis System
- ◆ Up to 4,500 GPD capacity with blend valve or 3,000 GPD pure RO water capacity
- ◆ True plug-and-play usability right out of the box; proprietary membranes and carbon pre-filter
- ◆ Blend valve to blend post-carbon treated water with RO water to customize the TDS. This also increases recovery/efficiency
- ◆ 66% recovery means 2:1 ratio (2 parts RO water to 1 part waste water)
- ◆ Onboard ultra-high capacity sediment and carbon hybrid filter with 75,000 gallon capacity
- ◆ Microprocessor RO controller with auto flush function, dual TDS meter, and low-pressure/high-pressure switches
- ◆ Stainless steel, multi-stage centrifugal pump (10.6 A draw, 110v standard plug) for continuous operation
- ◆ Liquid filled pressure gauges and flow meters
- ◆ Heavy-duty mechanical float valve, liquid level control option
- ◆ High-capacity 10" x 54" Carbon Tank upgrade option
- ◆ Pre-treatment lockout feature
- ◆ Anti-scalant option to prolong membrane life with 75,000 gallon capacity
- ◆ Dimensions: 18"H x 25-1/8"W x 18-1/4"D
- ◆ Part #11675 - \$5,495.00
